App Design Mockup

A general design for our client to give feeback on. This should give users an easy way to see progress, input mastery, and remaining study hours.

App Navigation

This is how navigation works within the app. We aimed to keep as simple as possible.

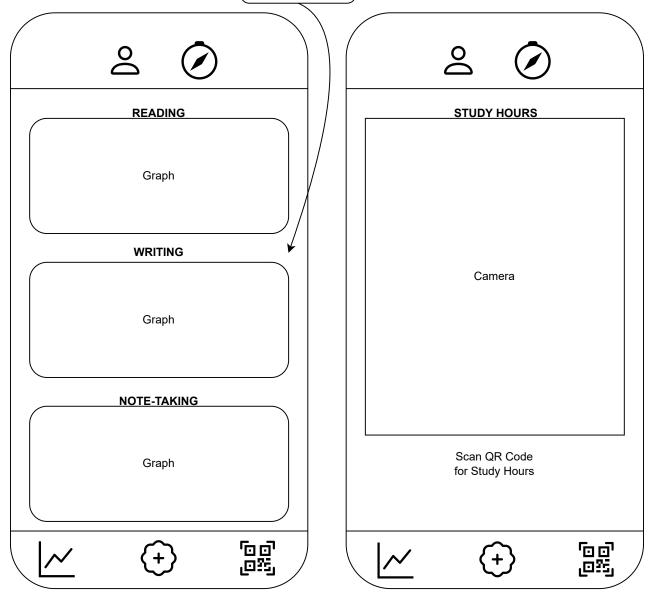

Main Navigation

Student App Views

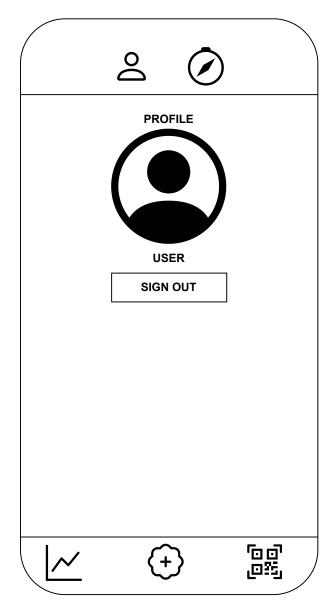

This is what the student would see while signed into the app.

This area is scrollable, so there are more graphs below these

	0	②

Skill: * Search			
Date: *			
	Sav	/e	
\ ~	(+	-}	

Student Analytics View Student QR Code View Student Mastery Input View

Student Profile View

Faculty App Views

This is what the faculty would see while signed into the app.

Not that some omitted views indicate that they will be similar for both student and faculty. We also need futher discussion to flesh outt the other pages

Alternative Navigation Designs

These are here to propose other layouts for the app, as I am not sure what is best for user feel.
